How should “Annealed” be read on an MTC?

Annealing Steel: Annealing Types, +I and Pipe & Tube Applications

What the document says	What should be clarified
Annealed	Which annealing type and which product specification?
+I	In EN 10216-2: Isothermal Annealing; verify grade and temperature range.
Solution Annealed	Verify stainless grade, product specification and cooling/delivery requirements.
Heat Treatment Condition + Test Results	The delivery condition must be consistent with mechanical test results and heat/lot traceability.
