What B36.10M does not specify

ASME B36.10M wrought steel pipe dimensions

Question	Appropriate source
Grade, chemistry and mechanical properties	Product specification such as ASTM A106, A53, A333 or A335
Allowable system pressure and temperature	Design code such as ASME B31.1 or B31.3 plus allowable stress
Product tolerances and testing	Product specification and applicable general requirements
Corrosion allowance and design life	Corrosion study, piping class and design basis
Flanges and fittings	ASME B16 standards and project specification
