# ASME B36.19M defines dimensions—not material or manufacturing method

ASME B36.19M stainless steel pipe dimensions

| Product specification | Typical product | Technical significance |
|---|---|---|
| ASTM A312 and ASTM A312M | Seamless, welded and cold-worked austenitic and duplex stainless pipe | Defines grade, manufacture, heat treatment and tests |
| ASTM A358 and ASTM A358M | Electric-fusion-welded austenitic stainless pipe | Weld class, filler, radiography and heat treatment matter |
| ASTM A409 and ASTM A409M | Large-diameter welded austenitic stainless pipe | Fabrication class and project requirements must align |
| ASME B36.19M | Common NPS/OD/wall dimensions | Does not define grade or weld quality |
