

Moving from legacy DIN to EN is not automatic equivalency

Market document	Historic role	Likely current route	Required check
DIN 2448	Seamless tube dimensions and mass	DIN EN 10220	Withdrawn status, dimensional scope and the separate product specification are independent review items.
DIN 2458	Welded tube dimensions	DIN EN 10220	Manufacturing route and product specification still need separate definition.
DIN 17175	Seamless elevated-temperature tube	EN 10216-2	Grade, delivery condition, test category and project acceptance must be mapped.
