Structure of the EN 10216 series

Part	Main subject	Typical use
EN 10216-1	Non-alloy steel tubes with specified room-temperature properties	Pressure piping and equipment at normal temperature
EN 10216-2	Non-alloy and alloy steel with specified elevated-temperature properties	Boilers, steam, heat exchangers and hot piping
EN 10216-3	Weldable alloy fine-grain steel tubes	Pressure equipment requiring higher strength/toughness
EN 10216-4	Non-alloy and alloy steel for low temperature	Cold and sub-zero service
EN 10216-5	Stainless steel tubes	Corrosive and special process service
