# Principal pipe and tube documents in the EN system

en-standards

| Family | Subject | Decision role |
|---|---|---|
| EN 10216 | Seamless steel tubes for pressure purposes | Part, grade, delivery condition, test category and examinations |
| EN 10217 | Welded steel tubes for pressure purposes | Welding route, material, temperature and service requirements |
| EN 10220 | Steel-tube dimensions and mass per unit length | Dimensional reference; not a complete product specification |
| EN 10204 | Inspection documents for metallic products | Inspection document type: 2.1, 2.2, 3.1 or 3.2 as defined by the contract |
| EN 10305 | Steel tubes for precision applications | Seamless/welded route, cold-drawn condition and hydraulic or pneumatic duty |
| EN 10210 / EN 10219 | Hot-finished or cold-formed structural hollow sections | Structural products; do not confuse with pressure pipe |
