

Which source owns which data?

Document or source	Primary data	Use limitation
ASME B36.10	NPS, OD, wall/schedule and nominal mass of wrought steel pipe	Material, grade and product acceptance come from a separate specification
ASME B36.19	Dimensions and common schedules for stainless steel pipe	Does not select stainless grade or fabrication requirements
Product specification	Dimensional tolerances, manufacture, testing and delivery condition	Does not by itself establish design pressure or material substitution
Design code and project	Required thickness, corrosion allowance, allowable stress and service limits	Must be reconciled with commercially available dimensions
